| 148-2 | 2 | | -33 | 60 | | | | | 0.30 |
| 148-3 | 3 | | -40 | 75 | | | | | 0.42 |
| 148-4 | 4 | | -46 | 85 | | | | | 0.54 |

NOTE: When using Q clamp 148 fittings for the top rail of a guardrail, the top of the upright must NOT be reduced in length but left at full height. The top of the tube will need to be capped using a Q clamp 133.

Shown priced and sold as a single fitting but normally used in pairs to create angles between 85° and 235°. A central tube is required to join the fittings together to create the angle. When working out the correct tube length dimension 'C' should be subtracted.
